

Integrated
Diabetes
Education &
Assessment
Service

About

IDEAS is an integrated team care approach to managing Type 2 Diabetes. Your patients will have access to comprehensive diabetes care provided by Eastern Health Endocrinologists with the wrap around services of community health, in one place at one time.

This service supports people with diabetes to manage their health, reduce the risk of diabetes complications and improve health outcomes while partnering with General Practitioners. Patients are seen regularly over a 12-month period by the endocrinologist and community health team. A case conference is completed between 9 and 12 months to facilitate ongoing care planning and discharge as appropriate.

Why refer?

- Credentialed Diabetes Nurse Educators
- Podiatrists
- Dietitians
- Access to interpreters**
- Accessible locations in the community
- Episodic care in partnership with General Practitioners (GP)
- Short wait time

*Associated Allied Health appointments may incur a co-payment fee. **Interpreters are available at no cost
